PROFESSIONAL EXPERIENCE

Graduate Research Assistant (Part-Time) **09/2025 – Present**
Laurentian University | Sudbury, Ontario, Canada

- Synthesized empirical findings across peer-reviewed studies, extracting and structuring quantitative variables, statistical outcomes, and executive-event data into research-ready datasets.

Product Designer (Contract-Remote) **10/2025 – 11/2025**
Enable App Inc | Milton, Ontario, Canada

- Designed complex, role-based operational workflows for the Service Coordination Support (SCS) platform across 8 user roles, including caregivers, case managers, service providers, finance teams, administrators, and approvers.
- Designed financial workflows spanning funding commitments, budget management, invoices, banking information, and multi-step review and approval processes, translating complex permissions, states, and cross-role handoffs into clear user experiences.
- Created accessible, data-rich interfaces aligned with WCAG 2.1 AA and AODA requirements, covering client records, financial information, documents, inquiries, notifications, and administrative tools.

Founding Product Designer (Permanent Full-Time) **12/2021 – 09/2025**
Pasargad Bank's TrigUP Accelerator | Tehran, Iran

- Directed end-to-end product design for Trigate, an Innovation management platform for startups and innovation institutes, taking the product from a 0-to-1 WordPress MVP to a multi-role B2B SaaS platform serving 40+ innovation institutes and 7,000+ startup users across all provinces of Iran.
- Partnered with Product Management on user research, product strategy, MVP definition, and roadmap prioritization, translating needs across founders, coaches, accelerator staff, and administrators into information architecture, workflows, prototypes, and a scalable design system.
- Redesigned onboarding using behavioral analytics, analyzing 100+ Microsoft Clarity session recordings, reducing registration drop-off from 21.16% to 0%.
- Identified customer barriers through discovery research and helped shape the Program-Based Modularity offering, contributing to growth from 22 to 42 innovation institutes.

EDUCATION

- **M.Sc. Computational Science** | Laurentian University (05/2025 – 08/2026) Grade: A+
- **B.Eng. Computer Engineering** | University of Qom (09/2019 – 02/2024) Grade: A

SKILLS

- **Research & Data:** Mixed-methods UX research, Qualitative and Quantitative Research, user/stakeholder interviews, usability testing, surveys, competitive benchmarking, journey maps, JTBD
- **Design:** Product strategy, interaction design, user flows, prototyping, design systems, responsive design, accessibility
- **Strategy & Collaboration:** Problem framing, market & competitive analysis, requirements gathering, user stories, MVP definition, outcome/metric definition (engagement, retention, task success), cross-functional partnership with PM/Eng, stakeholder communication, Agile/Scrum, roadmap alignment, feature prioritization, OKRs, workshop facilitation
- **AI & Technical:** AI-assisted Prototyping, Machine Learning (AI/ML), Agentic workflows, HTML/CSS/JS, Python, GitHub
- **Tools:** Figma, FigJam, Jira, Miro, Hotjar, Claude Code, Claude Design, Codex
